**Start Time:** 5:00pm

**Stop Time:** 6:00pm

---

## Old Business

**Action Item Status:** This is our first meeting so this is not applicable.

---

## New Business

### Discussion Summary:

#### Primary preferences of group members:

- Amey Avinash Tarfe:
  - 1. Fantasy League Game
  - 2. Social network
  - 3. Course registration system
- Christian Gonzalez:
  - 1. Course registration using the IU course listing as a backing

- 2. Health insurance and patient management system (petcare management system)
- Jainendra Kumar:
  - 1. Health insurance and patient management. (Instead of patient, it will be petcare management system, i.e. healthcare for pet animals like dogs and cats because not many centralized pet care system are available in any country so this would be unique, although there are few not so popular apps for pet care and animals)
  - 2. Event management system
  - 3. Fantasy game since Kumar is familiar with it and likes soccer.
  - 4. Portfolio, rental property management systems are also fine
- Xinran Dai:
  - 1. Social network
  - 2. Event management system
  - 3. Rental Property management system

#### Primary concerns:

Even though some are interested in the Fantasy game, most of us are concerned that this would too hard to implement, and some group members are not familiar with it.

As for social network, some concerns that this is a too mainstream topic.

#### **Decisions Summary:**

When deciding the final preferences, most members agree that health care system is ranked high enough in most preference lists, and the idea of it seems original enough to worth implementing. Thus, Health insurance and patient management system is decided as the first preference on the final list.

As for the second preference, event management system is chosen for the same reason.

According to popularity, the third is decided as social network.

Thus, the final preference list is as follows:

1. Health insurance and patient management system
2. Event management system
3. Social network

#### **New Action Items:**

The group has decided that each would take turns writing meeting minutes. The first meeting minutes (this one) would be Xin's responsibility.
