# Discussions of Group 9 on Customer Meeting Minutes 10/15/2018

## CSCI-P 465/565 (Software Engineering I)

## Meeting Attendees

**Amey Avinash Tarfe**

**Christian Gonzalez**

**Jainendra Kumar**

**Xinran Dai**

**Uteerna Koul**

## General Meeting Info

**Meeting Purpose:** The purpose of this meeting is to review the code and functionality of the project for that particular SPRINT 2.

**Start Time:** 1:30pm

**Stop Time:** 2:30pm

## Old Business

**Action Item Status:** The customer had specified certain requirements for the project which were discussed in detail and team-related issues were resolved.

## New Business

**Discussion Summary:**

At first, each team member explained the code for the completed components of the project from the previous SPRINT viz. Appointment Scheduler module and changing theme module. Secondly, the customer mentioned the backlog from this sprint (Insurance providers module and homepage UI changes). The customer stressed on the constant push/pull requests on Github and the use of JIRA, which was the main point from the last customer meeting. She also asked to switch the roles for the next

sprint. All the team members agreed to implement 'Insurance provider' module for the next sprint along with the backlog from the previous sprint.

**Decisions Summary:**

Everyone agreed on the customer decisions which were: to complete the module implementation for the next sprint, to complete the backlog from the previous sprint, frequent Git commits, switch roles during the sprint and use of JIRA.

**New Action Items:**

The group has to start implementing the Insurance providers' module for the next sprint.
